

Creating image inside Text effect

IMAGE  
MATRIX

LISA

ACADEMY

Open a new window; use any size, background is white. Go to Modify> Canvas >Canvas color. Change it into white.

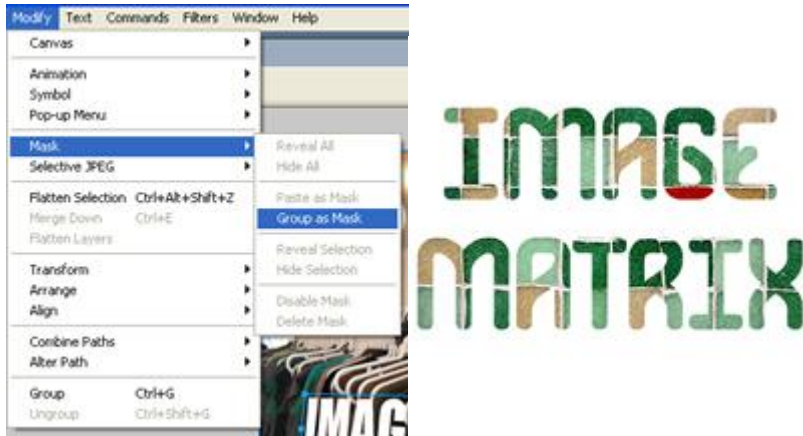

Import a picture of your choice to be filled in the text. Resize the picture to the canvas size.

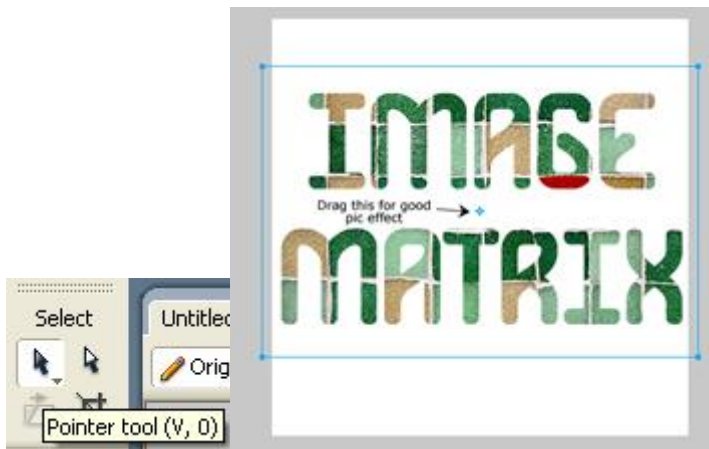

Type your Text, and the color is in white.

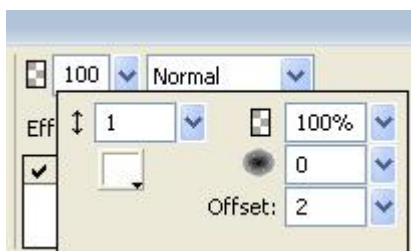

Then select both the text and image, Go to Modify and click Mask option then select Group as Mask effect where you can see the Image is filled in side the Text like the below image.

Then select the Pointer Tool for dragging the good view of picture effect to fall on the Text.

Give a Glow effect for the Text using Glow Effect Properties

Then select Modify and make a flatten effect of the Image.

You will be getting a Text filled with Image.
