

Twist and fade

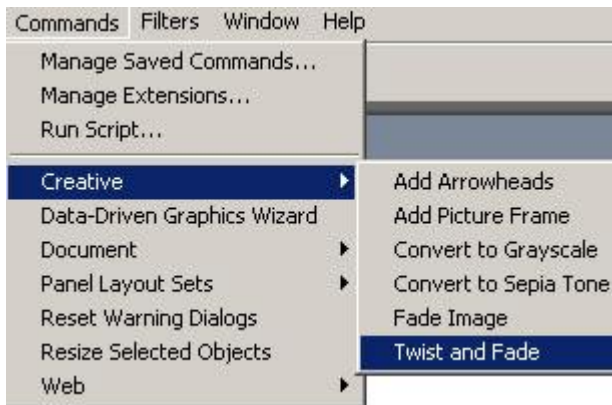

Step 1

Paste a clipped image on the canvas.

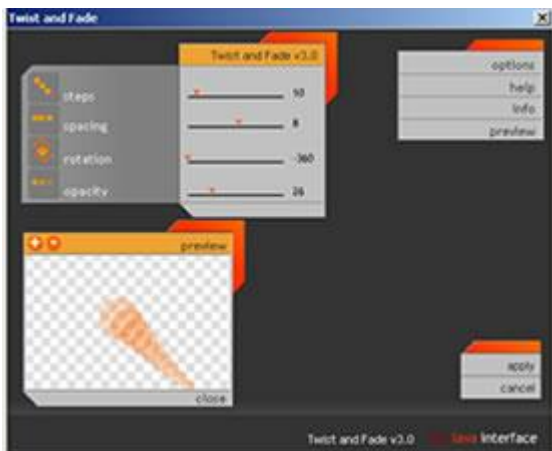

Step 2

With the image selected click on **Commands>Creative > Twist and Fade**

Step 3

Now, the **Twist and Fade** window is displayed.

Step 4

The main menu has the following options.

Steps - number of steps to produce

Spacing - spacing between each step

Rotation - degrees rotation between each step

Opacity - set the starting opacity of the image

Drag the sliders to set the values and view the live preview below.

The Options Menu has the options :

random effect - creates a random effect to the different steps, **convert to symbol** - converts the final creation to a graphic symbol,

fade opacity - changes the fade opacity between the number of steps

Step 5

Give and adjust the values
